

Washing your hands during Covid 19

If an adult has left our house to go to the shop they must wash their hands when they return.

Hands should be washed with water that is warm not hot and antibacterial soap.

We should not wash our hands more than this as it is not necessary.

We must not wash our hands more than this as it could make our skin very sore.

I will try my hardest to wash my hands only when I need to.

Mum and Dad will be very proud of me for washing my hands at the correct times.
