

Returning to School in August

We will still have to remember to keep 2 metres apart from everyone and wash our hands regularly and be careful when we cough or sneeze.

To begin with our school days might be shorter than normal. We might only go to school on certain days but it is still good for us to try and do this and ease ourselves back into school life. Our teachers and parents will help us know our new timetables and they will be really impressed with us for trying to do this.
